 - They want to see your logical thought process, not the final answer
 - Take a second to think!
- ⦿ Industry Knowledge

Additional Info

HireVue: Interview Alternative

What is HireVue?

- Online video interviewing platform used by employers in first-round interviews
- You will be provided instruction videos prior to your assessment. For each question, there will be a video explaining the question. You will have time to plan your answer, then 1 or 2 chances to record your answer. You don't need to use all the time given.

Which employers use HireVue?

- EY, Mercer, and many financial firms

What is the best way to prepare to do well?

- Because it's not interactive, it's possible to use notes during your video recording. Do thorough research about the company, then jot down bullets on why you want to work for them and why you are a good fit for the role.
- Maintain eye contact with the camera. While it's okay to occasionally look at your notes that you prepared by your screen, make sure you look at the camera and smile as much as you can. Be confident!
- Read the question. Take your time to read each question carefully, then organize your thoughts. Planning is important!
