The screenshot shows the LSA Mathematics website. At the top, there is a navigation bar with the LSA logo and the text 'LSA MATHEMATICS UNIVERSITY OF MICHIGAN'. To the right of the logo is a search bar. Below the logo is a horizontal menu with links: Home, About Us, People, Centers & Outreach, Seminars, Colloquia & Lectures, News & Events, and Diversity & Climate. Below this menu is a secondary navigation bar with the word 'for' followed by buttons for Undergraduates, Graduates, Alumni & Friends, and Research. The main content area has a breadcrumb trail: Home | UNDERGRADUATES | MAJOR AND MINOR PROGRAMS | ACTUARIAL MATHEMATICS. On the left side, there is a vertical navigation menu with the following items: UNDERGRADUATES (highlighted), Undergraduate Math Courses, Major and Minor Programs (highlighted), Declaring a Mathematics Major, Actuarial Mathematics (highlighted), Honors Mathematics, Mathematics of Finance and Risk Management, Mathematical Sciences, Pure Mathematics, Secondary Mathematics Teaching Certificate, and Mathematics Minor. The main content area features the title 'Actuarial Mathematics' and a sub-header: 'The University of Michigan Department of Mathematics is recognized by the Society of Actuaries as a Center for Actuarial Excellence!'. Below this, there are two paragraphs of text. The first paragraph describes the program's purpose: 'The Actuarial Mathematics program is designed to provide broad training in the basic mathematics underlying the operations of private and social insurance and employee benefit plans. The courses are organized to assist the student to prepare for several of the examinations of the Casualty Actuarial Society and the Society of Actuaries.' The second paragraph discusses non-credit review classes: 'Non-credit review classes for some of the professional actuarial examinations are organized each term; ask your actuarial advisor about the time and place of these classes. It is strongly recommended that some of these exams be passed before graduation. Summer internships are an important component of the educational program, and students are strongly encouraged to seek an internship no later than the conclusion of their junior year. Students are encouraged to take either Math 422 to satisfy their upper-level writing requirement.' At the bottom of the main content area, there is a link for 'Actuarial Subplan Checklist'. The word 'Advising' is partially visible at the bottom left of the page.

## Actuarial Mathematics

*The University of Michigan Department of Mathematics is recognized by the Society of Actuaries as a Center for Actuarial Excellence!*

The Actuarial Mathematics program is designed to provide broad training in the basic mathematics underlying the operations of private and social insurance and employee benefit plans. The courses are organized to assist the student to prepare for several of the examinations of the Casualty Actuarial Society and the Society of Actuaries.

Non-credit review classes for some of the professional actuarial examinations are organized each term; ask your actuarial advisor about the time and place of these classes. It is strongly recommended that some of these exams be passed before graduation. Summer internships are an important component of the educational program, and students are strongly encouraged to seek an internship no later than the conclusion of their junior year. Students are encouraged to take either Math 422 to satisfy their upper-level writing requirement.

# ACTUARIAL SUBPLAN CHECKLIST

[Link →](#)

The Actuarial Mathematics Program is designed to provide broad training in the basic mathematics underlying the operations of private and social insurance and employee benefit plans. The courses are organized to assist the student to prepare for several of the examinations of the Casualty Actuarial Society and the Society of Actuaries.

Non-credit review classes for some of the professional actuarial examinations are organized each term; ask your actuarial advisor about the time and place of these classes. It is strongly recommended that some of these exams be passed before graduation. Summer internships are an important component of the educational program, and students are strongly encouraged to seek an internship no later than the conclusion of their junior year.

The major program must include at least eleven courses: 4 basic courses (II), special Actuarial Mathematics courses (III), and 2 related courses as described below (IV).

**Prerequisites (5 courses) (must be completed with C- or better)**

Instructions	Course(s)	Student Elections (enter your course selections here)
Select one of the following pairs of introductory mathematics courses:	215 & 217 285 & 217 295 & 296	1. _____ 2. _____
Select both of the following Econ courses:	Econ 101 & Econ 102	3. _____ 4. _____
EECS 183 or working knowledge of a high level computer language (Fortran, C, or C++)	EECS 183 or working knowledge	5. _____
